

# Crestron 4K Certification Program

## “WHICH 4K PRODUCTS WILL WORK WITH MY DISTRIBUTION SYSTEM?”

AV specifiers, designers, and installers are all asking this question. Make sure your 4K products are in our directory of certified devices. Submit them to Crestron for testing and certification as part of a complete 4K Ultra HD distribution system.

### Benefits of Certification

- + Assurance of a better customer experience thanks to interoperability testing prior to products reaching the marketplace
- + Promotion of certified products to the Crestron network of dealers, consultants, and engineers
- + Listing on a Crestron website of recommended 4K products that perform consistently and reliably with DM®
- + Use of the Crestron 4K Certified logo for packaging, as well as print and online promotion

### How it works

- + Arrange an appointment to loan your displays, media players, projectors, cameras, or AVRs to the Crestron DigitalMedia™ Lab in New Jersey (pictured.)
- + Our DigitalMedia engineers will test your product(s) for interoperability with the DM platform and other Crestron 4K Certified products
- + We will provide a detailed report and the Crestron 4K Certified logo (provided your product passes)

Contact us today to schedule your 4K certification appointment.
