

# Government Support Services

Crestron has offices in every major market and country around the globe. Each is fully staffed to provide sales, technical support and training, ensuring an identical customer experience wherever you are in the world.

AV technology is vital to the collaboration, communication, and training processes and capabilities in government facilities. As various disparate systems such as AV, IT, lighting, and HVAC have become more integrated, government agencies are relying more heavily on Crestron control solutions to streamline and manage resources in their facilities.

Recognizing this need, Crestron established the Government Support Services Program (GSS). Designed to operate within the framework of our established consultant and dealer networks, the GSS Partner Program provides government and quasi-governmental agencies with direct access to our award-winning True Blue Support team, plus an Extended Standard Warranty on parts and labor, from three years to five years\*.

## Responding to your needs, anytime, every time

With a reach that spans the globe, our dedicated GSS Technical Support Hotline provides 24/7/365 emergency technical assistance. Wherever Crestron products are sold, the GSS Technical Support Team is there to support you from any of our offices around the world. For round-the-clock technical and customer support, call 855-445-6097.

## Technical Design Assistance

Whether you're designing new AV systems, or upgrading existing systems and infrastructure, the Crestron Technical Sales Team experts are standing by to assist you every step of the way. From huddle spaces and conference rooms, to training rooms and command and control environments, they offer you their unique ability to design economical, complete, and versatile solutions based on your specific requirements.

**To speak with a Tech Sales  
Team expert, call [800.237.2041](tel:800.237.2041)**

**CTI**

## Access to the Crestron Technical Institute (CTI) curriculum

An investment in education is the best preparation for the technological innovations ahead. Participation in the renowned CTI curriculum is the best way we can ensure that you get the most out of our technology.
